BALE OPENING SYSTEM

Purpose

Open fiber bales for precise metering to production line.

Application

Disposable hygienic production lines.

Features

- Precise metering of fiber to production machine.
- Process virgin or reclaim material.
- Feeds multiple production lines simultaneously or individually.
- Custom designed for individual production demands.
- Opens 30" x 36" and 42" x 42" cross section fiber bales.
- Reliable pneumatic conveying.
- Air filtration with fiber return.
- Bale Opener output capacity up to 3,000 lbs/hr.
- Volumetric Feeder output capacity up to 1,200 lbs/hr.

Options

- Custom sizes.
- Extra in-feed conveyor.
- Field Service.
- Spare Parts.
- Special fire protection.

Electrical Requirements: 70 h.p. (52.19 kw); operates at world voltages.

Space Requirements: Approximately 500 sq. ft. (46.45 m²)
